

WARRANTY

Warranty covers systems, equipment, and materials furnished and installed by US Enclosures. The coverage includes parts and labor associated with the repair of defects in materials and workmanship for a period of one (1) year from the Effective Date or Substantial Complete Date as defined in the Contract.

Warranty does not cover systems, equipment, or material failures arising from improper operation or inadequate preventive maintenance. US Enclosures' warranty excludes remedy for damage or defect caused by normal wear and tear, normal use, abuse, or modifications not executed by US Enclosures. Any such modifications shall render any warranty coverage for any and all installations void.

Should a warranty claim arise, a Warranty Log is required to accompany such claim to show proof that the products have been properly cared for. The warranty log should show date of inspection, area of inspection, condition at time of inspection, address and name of service technician, and if required the repairs performed. (Refer to attached Warranty Log)

In the event of our failure to respond to a written request for warranty maintenance, repair or service within ten (10) working days from date of request, US Enclosures hereby authorizes the Project Owner/Owner's Representative to have said defective work repaired or replaced. US Enclosures shall agree to pay the Owner/Owner's Representative, upon demand, all monies incurred in making good said defective work.
